MSB-SERIES WASTE SHREDDER

Equipment Overview

- Enerpat's technology is built upon the principles of low-speed, high-torque, rotary shear shredding. Enerpat's industrial shredders are robust, clean-operating machines that provide reliable performance with very little maintenance. Since 1936, Enerpat Shredding Systems has continued to extend the limits of possibility in size reduction. Whatever your application, you will receive the best designed, best powered and sized, most durable and capable size reduction solution you can buy. We've built our reputation on it.
- The robust construction of the machine with its very strong cutting unit guarantees great reliability and thus excellent overall performance. Materials such as paper, wood, rubbish, bulky goods, synthetic materials etc. are easily reduced to the required size. Long term experience in this field means we can provide the best solution for whatever is required.
